

INTRODUCTION TO LEAN SOLUTIONS

ROYAL COLLEGE OF SURGEONS, HOLBORN, LONDON

LEAN is recognised in the NHS as a key methodology for improving the efficiency and effectiveness of organisations through better organisation of existing resources.

This course is suitable for senior managers and improvement teams who want to build their awareness of the Lean Approach.

LEAN THINKING IN THE NHS

What will I get out of the course?

This event provides the opportunity for you to:

- Understand on the concepts and processes that underpin **LEAN** thinking
- Understand the transformation challenge and how to sustain change
- Experiential learning from tried and tested 'mini' workshops
- CD with all course presentations and material

Who is running the course?

The course is conducted by Ketan Varia and Rob Worth of Kinetik Solutions both experienced Lean practioners, with substantial experience from the private sector. Ketan Varia has led the Lean Education and practioner coaching for Bedford Hospitals Trust as well as working in several hospitals around service line improvement. More details of our work at <http://www.kinetik.uk.com/>

Who should attend?

Chief operating officers • General managers and Divisional managers • project managers • clinicians • matrons and senior nursing staff • internal change agents • members of NHS staff working in service improvement and transformation.

Please contact us at admin@kinetik.uk.com for any queries

AGENDA

LEAN THINKING IN THE NHS

- 9.15am Introduction and Overview of Lean
Where does Lean emerge from, where has it been successful and what is its premise?
- 9.45am Lean in the Light of a 21C NHS
Where does Lean Transformation sit in line with the Darzi Agenda, World Class Commissioning, Service Line Improvement and the pressure on finances?
- 10.15am Case Studies of Lean in the NHS
What benefits has pioneer trusts delivered in light of Lean? We will look at examples from several Trusts
- 10.45am Break
- 11.00am Workshop 1: Red Patient/Blue Patient Exercise
A powerful exercise that demonstrates that excellence is easy to recognise and visualize, and that the capability of change exists in all staff in an organisation
- 11.45am Main Principles of Lean
The 5 principles of lean are explained with examples in relation to the NHS, as well as practical, real world experience
- 12.15pm Workshop 2: The Seven Wastes
Participants will bring their own examples of waste from their trusts, by reviewing digital photos and discussion
- 1.00pm Buffet Lunch
- 1.45pm Value Stream Mapping
Value stream mapping is similar to process mapping 'end to end' flows from a patient perspective, but it offers greater insight to current ways of working
- 2.15pm Transformational Planning
What are the key elements to have in place before embarking on the journey of transformation? What are the essential checkpoints and good practice?
- 3.15pm Workshop 3: Focus on sustainability
A review of transformation at other Trusts and the private sector. What are the lessons learnt around sustainability?
- 4.00pm Lean and other approaches
How does Lean fit into other transformational models? Where does Lean not work and what's the next step from Lean?

4.15pm Review of Day and Close
